

## Patrol and Workforce Management Technology

The powerful TourTrax Mobile Application suite is designed for the Guarding and Workforce management industry.

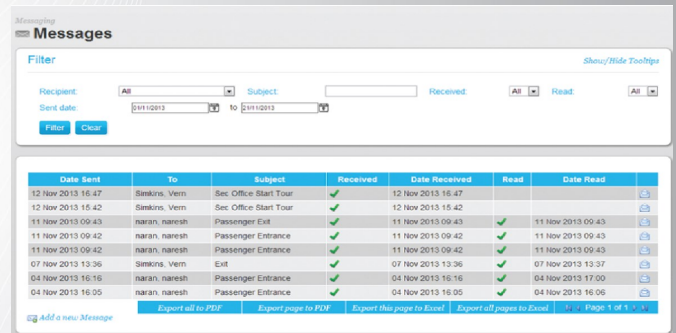

## Dynamic Forms creation

Create your own forms to be filled in by mobile user. No more waiting for developer to change or program new forms for your workforce, no more "EXTRA" charges.

## Broadcast messages to users "on the fly"

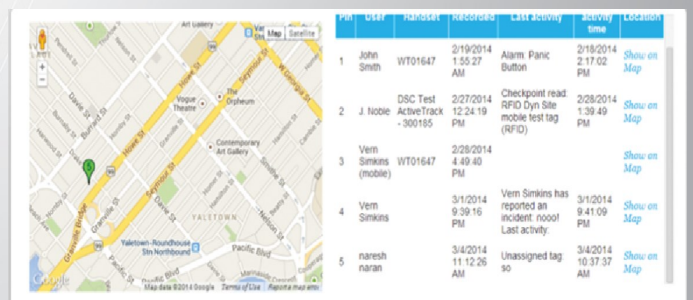

The Messaging system allows you to send messages directly to a mobile user's phone and receive acknowledgement when they are received and read.

## Real-Time GPS Tracking\*

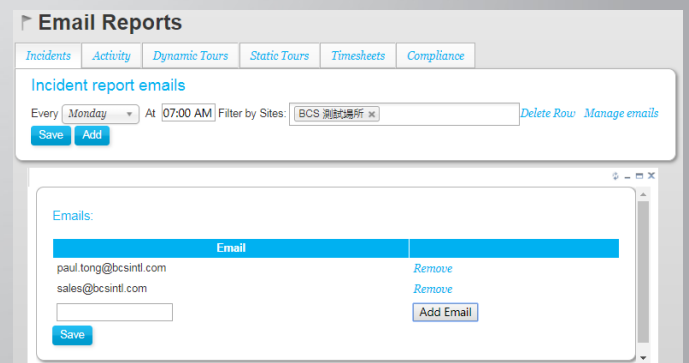

Track the "last-known" locations of your employees and the paths they take when they perform Tours.

\* Requires GPS enabled hardware.

## Automated Email Reports

Through the Auto Email feature, Timesheets, Tours, Incidents and Compliance Reports can be emailed automatically in PDF format to multiple recipients on a daily, weekly, or monthly basis.

# Guard Tour Management

## Incident Report with optional link to WORX

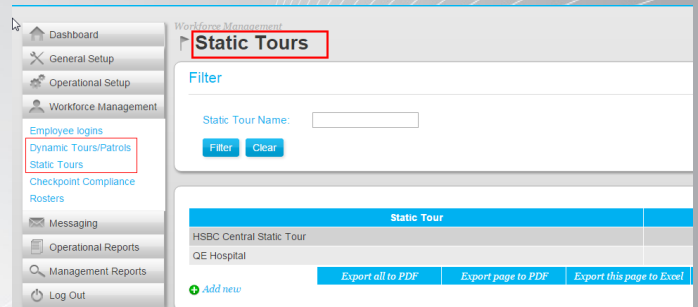

Report incidents in user-defined forms with Picture/GPS stamping, and optionally link report to work order created in WORX - Workforce Management module.

## Flexible Tour Types

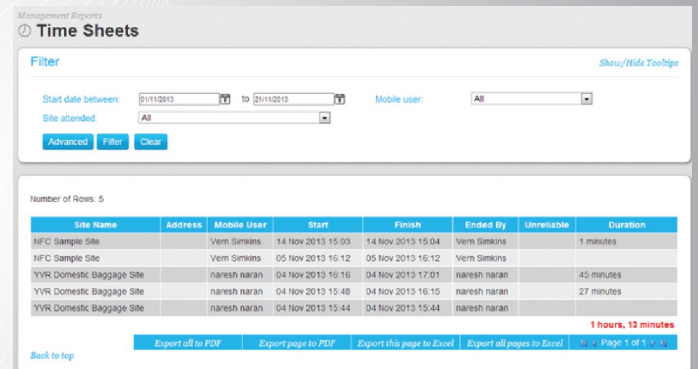

• **Static Tour** - Start and end Tours based on specified checkpoints and schedule, use for traditional Guard Patrol.

• **Dynamic Tour** - Start and end a Tour anytime using "Dynamic Tour" tag, use for Mobile Patrol/Supervisor.

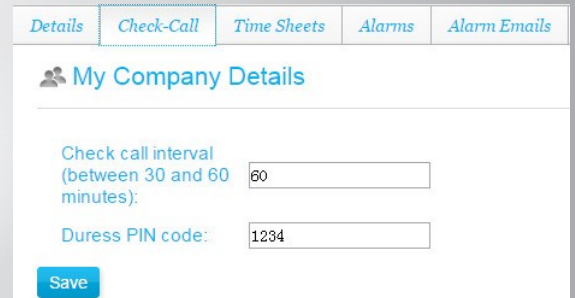

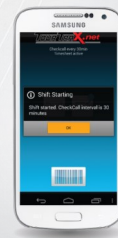

## Time & Attendance

Monitor the time spent by workers as they visit and leave the premises of each property. This information can be used for billing/HR purposes.

## Lone Worker Monitoring

Optional "Check Call" feature prompt worker for designated PIN code to ensure their safety and alertness.

## Checkpoint Compliance

Track single or multiple checkpoints to see how frequent they are visited within a day, week or month and receive reports based on compliance expectations.

## Rostering

Create Roster for workers which will be monitor for "Proof of Presence" and reported if non compliancy.

# Workforce Management

## Report from Guard Tour triggers Work Order in WORX

Report submitted in Guard Tour can trigger new Work Order in WORX module which will be scheduled for employee.

## Create Job for Customer, Site, Asset

New Jobs can be created and scheduled for Customer/ Site/Asset and assigned to Maintenance staff.

## Associate Form with Asset

Associate Form with an Asset so that when the Asset tag is read, the Form will be pop-up for the worker to fill.

## Schedule Employee Job with Accept/Reject option

Jobs scheduled for an Employee are notified on the Employee's mobile according to a Lead time. Employee can Accept/Reject the job.

## Pre-populate Form with Customer/Site/Asset info

Forms associated with a Customer can be pre-populated with the Customer/Site/Asset information for the Employee to see on the mobile.

## Connect Form to internal application via API

Information submitted on Form can be linked in real-time basis to customer's internal applications via custom API through Web services.

## “Customer” Portal

Customers can log in to view what checkpoints were visited in a “Proof Of Presence” (coverage) report.

## NFC, QR code (2D Barcode ) & Barcode Ready

TourTrax.net APP is compatible with all smartphones and tablets with Android 4.2 and above. It can use NFC tags (NFC-supported phones only), QR code or regular Barcodes as checkpoints.

## Multiple Types of Devices are Supported

In addition to Android mobile phones, TourTrax.NET also supports integration with many industry leading Guard Patrol systems such as RR-9000, WiTrak, Datix Nano, Proxim, ActiveGuard, OCom, Blue Card etc.

## Web Based Cross Platform compatible

System management is run on a Web-based client which is compatible across all popular Operating Systems (Windows, Mac OSX & Linux) and Web Browsers (Internet Explorer, Mozilla Firefox, Google Chrome, Apple Safari & Opera).

## Secured Hosting

TourTrax Cloud platform is hosted by the most secured facility in the industry - **Microsoft's Azure** data centers, which have 7 levels of security from staff clearance to military grade encryption. Data are backed up to a twin center on the opposite side of the world.
