Visitor Management System

掃描名片 Name Card scanning

掃描名片以簡化手動輸入訪客資料。

Scan business card to facilitate input of Visitor information.

檢查承辦商行業執照 Contractor License requirement & Validation

按承辦商的工作/項目檢查相關有效的執照。

Check license based on work type / project.

自定義進場審批流程 User defined Custom workflow

用戶可為不同訪客類型（普通訪客，承辦商，清潔工，快遞，VIP...）設置進場審批流程。

User defined Custom workflow for different visitor type (Guest, Contractor, Courier, Janitor, VIP...).

獲取進場批准 Request Entry Authorization

為各場所或個別受訪者設置是否需要獲取進場批准。

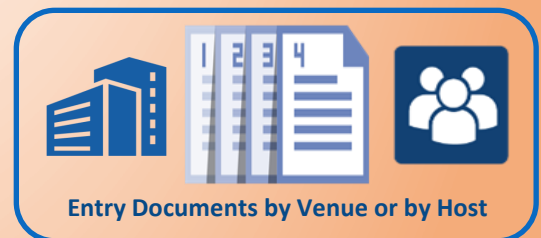

Define by Venue or by Host whether Entry Authorization is required.

自定進場/離場文件 User defined Entry/Exit Documents

為各場所或個別受訪者設置進場/離場所需文件。

Define by Venue or by Host the required Entry / Exit Documents.

Visitor Management System

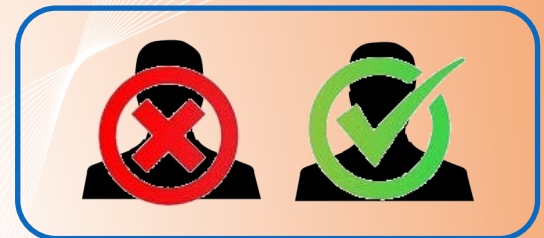

項目與承辦商管理 Project / Contractor Management

後台提供項目與承辦商跨場所（區域）管理模塊。
Web based module provides cross site (Regional) management of projects and contractors.

訪客和承辦商的黑白名單 Black & White List for Visitor and Contractor

訪客和承辦商的黑白名單以提示員工。
Black and White list of Guest and Contractor to alert staff.

地理圍欄提醒訪客登記/登出 Geofencing alerts Visitor to Sign In/Out

地理圍欄功能提醒訪客到場時登記和離場時登出，并退還借物或取回存放物件。

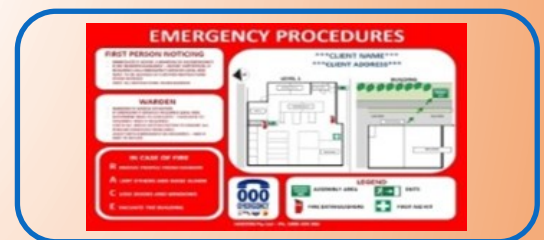

Geofencing feature alerts visitor to Sign IN / OUT when arriving / leaving site and return loan items.

緊急疏散通知 Emergency Evacuation notification

緊急疏散情況時發出警告給訪客并提供訪客清單給相關人員如消防和警隊。

Alerts visitors of emergency evacuation and also produce a list of visitors for the Fire Warden or Police Superintendent.

借用和存放物件 Loan / Store Items

管理訪客借用或存放物件和押金。

Manage Loan or Store items and deposits for visitors.

Visitor Management System

門禁系統集成 Access Control integration

如場所安裝了門禁系統，我們的訪客系統使用最先進的動態二維碼技術來集成至現有的門鎖，機閘，梯控，可防止非法複製并同時限制訪客進場日期/時間/次數。

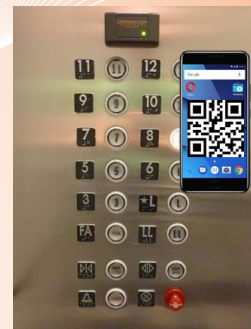

For sites with Access Control, VMS uses the most advanced Dynamic QR Code technology to integrate into existing Door, Turnstile and Elevator Control, providing solution for unauthorized replication of QR code and control access by date/time and number of access.

門鎖 Door Control

機閘 Turnstile Control

梯控 Elevator Control

隨機加密二維碼 Scramble Encrypted QR code

隨機加密二維碼技術自動加密和更新二維碼，解決非法複製IC卡或二維碼問題，同時限制訪客進場的日期/時間和次數，比傳統使用RFID技術更安全可靠。

Using **Scramble Encrypted QR Code** technology which refreshes the QR code itself, VMS solves the problem of unauthorized replication of IC card and QR code, making it more secure than the traditional RFID technology.

使用自動售票亭模式實現無人值班 Kiosk mode to achieve Unmanned operation

使用自動售票亭模式與門禁系統和可視對講集成來實現無人值班。

Self-served Kiosk integration with Access Control and Video Intercom to achieve Unmanned operation.
